

WATERSHED Education

Model demonstrations & salmon life cycle games

STREAMSIDE Education

Salmon fry release, invertebrate sampling, & habitat assessments

SHORELINE Education

Forage fish surveys, beach seining, & crab identification

“

This is a highly experiential opportunity for the students with unbelievable connections [...]. The students are excited to return to the beach, to do more surveying, and to build a legacy of stewardship and partnership with a specific place and piece of land. What could be more beautiful than that?
